UX Designer/Developer
Austin, Texas Area

Experience

Experience Designer at Razorfish from November 2015 to Current

- Implemented results-oriented UX solutions for driving form completion rates for a international client
- Managed multiple and overlapping client deliverables and deadlines to consistently make weekly deliveries of experience specifications to client

Interaction Designer at Tk20, Inc from May 2014 to November 2015

- Owner of UX on multiple projects, producing wireframes, prototypes, sketches, flow diagrams, journey maps, and other UX deliverables
- Responsible for managing UX on series of releases made solely for the company's largest client
- Designed for enterprise, software as a service, web and mobile
- Served as product owner in scrum team, providing product vision and resolving UX-related impediments
- Aided front and backend developers with implementation of designs in HTML, CSS, and Javascript.

Strategic Designer at Glerb, LLC from December 2013 to May 2014

- Wrote grants and helped secure funding for a new startup
- Helped to clarify and simplify business plan so it could be better communicated with potential investors
- Worked closely with executives, developers, and interaction designers as part of a very small team to create a new product

User Experience Design Intern at IBM from June 2013 to August 2013

- Designed new applications for IBM's Watson cognitive computing platform
- Conducted field research in difficult and unconventional conditions to establish a better understanding of otherwise disenfranchised users
- Created wireframes, storyboards, and other deliverables for frequent presentations to management
